Adventures and Exchanges

Bonjour and Hola

This year, we had unforgettable travel experiences!

“Class trips“

The 5th graders started with exploring the outdoors in Gersfeld, while the 7th graders started with team-building adventures.

“Exchanges“

Our 9th graders had the chance to travel to France or Spain! They explored new cities, learned about different cultures, and even practiced their French and Spanish. We also welcomed students from France and Spain to our school. So some of the students made it to a year full of new friendships.

“Final trip and a trip full of charity“

The 10th graders enjoyed their final trip to Berlin, exploring history and modern city life and the most important thing having fun.

A highlight was the 11th-grade trip to Sri Lanka, where the students used donations to build a house for a family in need.

Which Flag belongs to which grade?

11th grade
9th grade

9th grade

5th/7th grade

„Senior prank“

Seniors turn the school upside down

Every year, the seniors celebrate their graduation with a hilarious prank, and this year was no different! The Albert Einstein School was thrown into chaos as the graduating class went all out with their creative mischief.

Toilet paper was everywhere—hanging from hallways and staircases. Classrooms were emptied of their chairs, leaving students wondering where to sit. To make it even crazier, water fights broke out, and no one was safe from getting soaked!

This year's prank was a perfect mix of fun and creativity, leaving the entire school laughing. The seniors truly went out with a bang, ending their time here in unforgettable style. Best wishes to the Class of 2024!

Is it your year for the graduation prank? Here are some tips to make it epic:

Best moments of the year - fun, spooky, special

“The Halloween Party“

This year was amazing! We had so much fun at our Halloween Party with cool, funny and spooky costumes. We had a very tasty buffet. Everyone danced, played games and enjoyed this wonderful evening.

Most of you said, this was the most beautiful dress:

”The Senior prom“

The Senior prom was the most special night for the seniors at our school. They celebrated their diploma with fancy outfits, speeches and a lot of dancing. It was a night to remember for them.

”The Concerts“

The Albert Einstein School had a summer and winter concert in the atrium. All parents were invited. Students from almost all grades sang or played instruments. It was a great event.

Do you remember which group played which type of music?

Rock music

Choir

Underclass students

Schoolband

Pop music

Teacher band

„Schulradeln” A ride on the bike for the charity

This year, the Albert Einstein School took part in Schulradeln, a state-wide competition encouraging students to ride their bikes and collect kilometers. Our school was excited to join the challenge and show how active and environmentally friendly we are.

Website for joining

Many classes participated with great enthusiasm, and together we cycled an impressive number of kilometers. The class that stood out the most was 8a, which cycled the most kilometers and won first place for our school! Their efforts were recognized with a certificate and a class trip as a reward, which they are still looking forward to.

Schulradeln was a fantastic experience for everyone involved and showed how committed our school is to staying active and protecting the environment. We can't wait to participate again next year!

Let's keep cycling, stay active, and make a positive impact on our environment together!

"National Youth Games"

A Great Experience for Albert Einstein Gymnasium

This year, students from Albert Einstein Gymnasium took part in the National Youth Games in Hessen. We traveled there by train as a school, while some students were driven by their parents.

During the event, we competed in various activities, including throwing, running, and long jumping. Seven students from each 8th-grade class participated in the relay race, working together to give their best performance.

Despite the hot weather, everyone had a great time. We stayed motivated and supported each other throughout the day, making it a fun and unforgettable experience.

Our biggest project

The Building-B, our oldest building, which is used for biology, chemistry, physics and music, shows that it's really old. And because of this, it must be renewed. But then we couldn't use this building and we are over 1200 students.

The building C and A would be too small for the students. Because of this, a new building

must be build. Since 2023, the Building-D is building and 2025 it should be finished. In this pictures you can see the beginning of the building, how it looks now and how it should look like. We all looking forward to get lessons in this building!

Today the building looks a bit like that, but now it has windows and it's painted black. But it don't look much different than now. We haven't a newer picture, so we need to use that...

When do you think the building will finished?
We will see...

Did you see on any picture the person, who gave our school the name?

One and only 2024

Hello! Welcome to our yearbook of Albert Einstein High school.

Wow, 2024 ends soon and 2025 will start. This year went by fast, but it was exciting and nice and because of this, we'll show you in this yearbook, what happened in this year. But that wasn't everything. We'll show you too the special things of our school! School isn't every time boring and hard. Often it's exciting and funny too! But we don't want to say anything else...

We hope you'll like this yearbook and have fun!

Mara, Ilaria, David

This picture shows a part of our school. This building is called "B-Gebäude", and it's the main (and the oldest) building of our school. The picture is a bit old, but it isn't much different than

This picture shows our teachers. It's a bit old too, but the most teachers are still here.

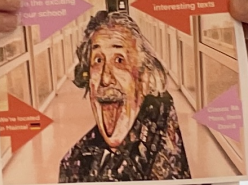

Have you seen the letters of our buildings in the pictures?

This is our school director Claus Wörn.
